POLYSTYL has developed R-MAX, a new wear layer surface treatment using reinforced polyurethane combined with aluminum oxide. Aluminum oxide is the third hardest substance after diamond and carbon. Therefore R-MAX has a wear resistance 3 to 4 times greater than polyurethane. R-MAX, thanks to its hardness avoids scuff marks, eases maintenance, increases durability and protects the appearance of the flooring.

CARE AND MAINTENANCE

A correct maintenance will keep your floor looking like new.

- Scuff marks, various types of shoes soles may cause scuff marks. If scuff marks appear, we recommend you identify the cause (eg. joggers/runners) and remove. No claims will be accepted for scuff marks.
- Avoid surface scratches by sweeping or vacuuming your floor as often as necessary to remove loose dirt. Weekly maintenance should be carried out by washing the floor with water and a neutral PH floor cleaner.
- To protect more efficiently the surface and keep your floor looking like new, you protect the surface with a suitable neutral PH wash and shine product. This product requires no rinsing after application.
- Extra surface protection can be achieved by applying a low gloss floor polish.
- Do not use wax.
