Maintenance

A correct maintenance regime will enhance the life expectancy and appearance of your flooring.

Avoid surface scratches by sweeping or vacuuming your floor as often as necessary to remove loose dirt.

Weekly maintenance is by way of mopping/washing the floor with luke warm water, a recommended neutral detergent or floor cleaner and rinse with clean water.

Removal of Stains

It is possible to remove stains with pure floor cleaner.

Do not use solvents.

In case of tar and other stubborn marks, clean with white-spirit if necessary.

Particular Care

Do not use wax.

Protect furniture and chair legs with plastic or felt tips since wax may migrate.

Do not use rubber wheels and pads.

If using caster chairs ensure suitable caster chair mats are used.

Do not lay the material in a room where chemicals are used.
